Welcome to Wedel Beef Genetics' 24th Annual Bull & Replacement Female Sale

Welcome to our 24th annual production sale. We, and much of the southern plains have been blessed with some much needed moisture, and are off a summer/fall calf market that routinely valued weaned calves over \$1500 per head and yearlings over \$2100. The bulls we'll offer on March 12th are the result of breeding decisions made in the spring of 2022, but more than that they are the product of 9 years of testing for Feed Efficiency, 40 plus years of feedlot and carcass data collection and more than 10 generations of our cow herd being honed for maternal efficiency and environmental fit against all our western great plains location could offer.

2024 will be our 7th year of using the \$Profit suite of economic selection indices to describe our cattle, and offer ranchers what we feel is the industry's most meaningful tool to compare cattle for their relative contribution towards "whole-herd" profitability. Last year, \$Profit and \$Ranch indices were updated to include the Zoetis Fertility EPD, which predicts differences in the number of calves produced over an animal's daughters' 8-year productive lifespan. Each bull will sell with a Fertility EPD and percent rank which contributes significantly to their respective \$Profit and \$Ranch values. \$Ranch predicts differences in profitability for cow calf producers that retain their own replacements, but also sell their steers and cull heifers at weaning. \$Feeder looks at those post-weaning traits that impact the profitability for those feeders who purchase our customers' calves.

2024 will mark our 9th year of collecting individual animal dry matter intake (DMI) to evaluate the relative efficiency with which our cattle convert feed. It wasn't very long ago that pens of cattle with feed conversion below 6 lbs. of dry matter per pound of gain were newsworthy. A good percentage of our 2024 sale bulls converted below 5, and a handful of bulls converted below 4 lbs of dry matter per pound of gain. We are confident that the progress we are making to improve feed efficiency is going to play a big part of making our customers' herds more profitable and our beef industry more sustainable for future generations.

This will be our 8th year of selling bulls with our good friends at Anderson Land & Cattle. Our ranch customers from the high deserts of eastern Oregon and northern Nevada tell us their ALC prefix bulls hold up just like the Wedel bulls, which we expect since they are developed exactly the same and the Andersons share very similar selection priorities. Thanks again for your interest in Wedel Beef Genetics, please let us know if we can better serve you in either bull selection or in the marketing of your next calf crop!

Frank and Susan Wedel

Calving Season Ran a little late last spring...

Frank and Susan Wedel Welcomed two new Grandkids since the last sale!

Lauren and Jared Gooch (left) added their fourth child, Calvin on 5/21/23.

Whitney and Timothy Chapman (below) welcomed their first, Collette on 3/8/23.

WEDEL BEEF GENETICS

24th Annual Bull & Replacement Sale

Tuesday, March 12, 2024

180 - Feed Efficiency Tested Bulls that will improve Ranchers' Bottom Lines

- 150 Commercial Red Angus Open Yearling Replacements

10 - "U-Pic-Em" Registered Red Angus Open Yearling Replacements

Schedule:

Monday, March 11th

All Day - View Sale Bulls & tour Wedel cowherd

Tuesday, March 12th

9:00 am - Bulls penned for viewing

11:00 am - Lunch, compliments of Wedel Red Angus

12:00 Noon - 24th Annual Wedel Production Sale

- Bulls Sell in Catalog Order -

Accommodations:

Hi Plains Motel, Leoti, KS 620/375-2239

Best Western, Scott City, KS 620/872-7373

Absentee Bidders: *If you cannot attend the sale, bids may be directed to Wedel Red Angus or one of the listed buyer representatives. All bids will be handled confidentially.*

• Customer Incentives •

Volume Discounts: Buy 5 Bulls and get a 3% Discount • Buy 10 bulls and get a 6% Discount.

Trucking Discount: Haul your bull purchases away on sale day, or arrange to pick them up at the ranch no later than Friday, March 17th and receive an additional \$100 per bull discount. Trucking discount does not apply to commercial or registered females.

Meet the Team:

Dean and Kinzie Labuschagne

(left) Dean is the Foreman at our Wallace Ranch where the mature cow herd runs. He and Kinzie were blessed with their son, Jaeger, born 6/22/23.

Adolfo and Betty Ibarra

(right) Adolfo has been with the Wedels for 45 years. Adolfo and Frank manage the head-quarters where the bulls and replacements are developed and the two-year-olds raise their first calves.

Anderson Land & Cattle, Inc.

The cattle produced at Anderson Land & Cattle have been founded on strong maternal, growth and carcass traits since the mid 70's. We have used many selection tools along the way to accelerate our genetic progress. Artificial Insemination, carcass data collection and embryo transfer are standard operating procedures. Good cow families produce good bulls. Our females are scrutinized heavily and must produce and prove their value. We are realizing the improvements made through years of production records. By selecting those strong females as donor cows we can produce a larger percentage of calves born each year with those important genetics.

We strive to produce cattle that excel in every measurable area. Finishing our cattle in our own lots allows us to observe and measure progress from the day they hit the ground until they leave the yard headed for the rail. Since 2010, over 1400 home raised cattle have earned 21 Red Angus Gridmaster awards. Our pasture to plate operation is providing us the ability to build a better bottom line, one cow at a time for our program and yours. Thanks to the Wedels for allowing us to join them in offering you some great profit opportunity selections.

Sincerely,
The ALC Crew

DVAuction

Broadcasting Real-Time Auctions

Watch and Bid Online at DVAuction.com

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DVAuction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Creat New Account" tab
- Enter a user name, password and your contact information.
- Complete the Banking Information. (If you are only interested in viewing you can skip this section)
- Select your Time Zone, Accept the Terms and Conditions and click "Create Account"
- Complete the process by answering a few questions, selecting your subscription choices
- Click on "Apply for Bidding" in the upper left corner of your screen to select the sales you wish to bid on
- Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
- If you would prefer to be approved using your credit card, call (402) 316-5460.
- Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Three Generations of Wedels

At Wedel Beef Genetics, Rancher Profitability is Job #1

In the fall of 2015 we introduced our goals of improving beef industry profitability through improved feed efficiency. Now, four years later, we're making our feed intake and conversion data even more meaningful. By leveraging the complete contemporary group data we collect on all of our bulls against hundreds of thousands of animals that have been similarly evaluated by the \$Profit team, we bring the power of pedigree relationships to the prediction of feed efficiency and in this year's catalog will present this information in a true multi-breed Feed Efficiency EPD: **F:G**. In addition, the relevance of Feed Efficiency data and the resultant EPD are enhanced through its inclusion in a multi-breed economic selection index; **\$Profit**.

How \$Profit Works:

\$Profit assumes that the average commercial bull will sire 100 progeny over his lifetime, that 30% of the replacements will be retained and that the rest of the heifers and all of the steers will be finished and sold on a value-based grid. Even though many ranchers sell their calves at weaning - and don't own them all the way to harvest, we have seen feedlots' willingness to pay for calves from genetics recognized for superior post-weaning value.

Example:

- Bull A has a \$Profit of \$8,000
- Bull B has a \$Profit of \$4,000
- We would expect Bull A to produce \$4,000 (\$40/head x 100 calves) than Bull B.

\$Profit = One number that predicts your bottom-line!

How F:G (Feed/Gain) Works:

Predicts differences in the amount of feed a bull's progeny will consume to produce one pound of gain.

F:G Example:

Bull A = 0.25 F:G EPD
Bull B = -0.25 F:G EPD

Progeny from Bull B would be expected to consume 1/2 pound less dry matter for each pound of gain when compared to progeny from Bull A.

*Feed Efficiency Testing
Wedel Beef Genetics*

What traits are included in \$Profit?

Nearly every trait that impacts profitability. The relationship between most traits and profit is usually straight forward. Here is the list relevant traits and their impact on \$Profit:

Revenue Traits:

- Calving Ease = More Calves
- Weaning & Yearling EPD = More payweight
- Fertility = more calves produced over a cow's lifetime
- Carcass Weight = worth more up to 1050 lbs.
- Marbling = valued based on grid premiums
- Ribeye area = value as impacts Yield Grade
- % Retail Product = more yield is more meat

Cost Traits:

- Cow Mature Size = in general, bigger eats more
- Cow intake = increased feed intake means increased costs
- Feed Efficiency = cost of Gain
- Carcass Weight = worth more up to 1050 lbs.
- Marbling = valued based on grid premiums

Some traits are less easily characterized. Milk for example, is a good thing until you get too much. When milk EPD moves over +25 it begins to have more of a negative effect on fertility than the positive effect it has on weaning weight.

Selection Simplified: \$Profit, \$Ranch & \$Feeder

\$Ranch:

\$Ranch was developed for cow calf producers who retain their own replacements and market 100% of the steer calves and cull heifers after weaning. This is a very typical production system for a majority of beef producers, so \$Ranch is an excellent tool for producers to compare how different bulls will impact their profitability.

Traits included in \$Ranch = Fertility, Milk, Weaning Growth, Cow Herd Feed Intake and Mature Cow Size

Multi-generational use of \$Ranch will ultimately result in increased pounds of calf harvested per unit of feed/land resource.

Example:

- Bull A has a \$Ranch of \$80
- Bull B has a \$Ranch of \$40
- We would expect Bull A to produce \$40/head greater profit than Bull B.

\$Feeder:

\$Feeder is a tool developed to compare how bulls will impact profitability in the post-weaning phase (weaning to harvest).

Traits included in \$Feeder = Feed Conversion, Carcass Value (Marbling & Yield Grade) and Carcass Weight

Example:

- Bull A has a \$Feeder of \$100
- Bull B has a \$Feeder of \$150
- We would expect Bull B to produce \$50/head greater profit than Bull A during the feeding and finishing phases of the production cycle.

Cow Herds Built to Last - FERTILITY EPD

The Cow Fertility EPD predicts large differences in the calf crop percentage expected from a bull's daughters! High Fertility EPD bulls will build cow herds with consistently better breed back, higher calf crop percentage weaned, less culling requirements, and reduced replacement rates. Improved calf crop percentage drives HUGE differences in profitability. The Cow Fertility EPD was incorporated into both \$Ranch and \$Profit in January 2023 due to its huge impact on Profitability.

Fertility EPD Example:

- Bull A has a FERTILITY EPD of 2.0
- Bull B has a FERTILITY EPD of 1.0
- We would expect daughters of Bull A to produce 1 more calf during the first 8 years of their life when compared to daughters of Bull B

LOT 1 - WEDEL GRAND SLAM 3377

This bull loaded the bases with his 16 CED to 129 YW Spread, breed leading Fertility, and "off-the-charts" marbling...then he hit it out of the park with profit predictions that exceed the top 1/10th of 1%.

He's long as a well rope, so it would be pretty tough to imagine how many PRIME steaks could be packed under that big top. His Black/Red dam is a moderate, easy fleshing first calf heifer that functions beautifully on our native western Kansas range.

We plan to use this bull in our program

LOT 2 - WEDEL LEGITAMATE 3051

This bull is the real deal! He got better with each trip through the chute, posting ratios of: 112 weaning, 107 yearling, 103 IMF and 117 REA. His 2-year-old dam is a half-sibling to Wedel Prime-Time 007 and already has earned a 105 MPPA under range conditions. Imagine the big middled, easy fleshing daughters he will spread across your ranch, then imagine the built-in Fertility, pay-weight and Marbling that they'll pass on to their progeny. This guy is more than your next herd bull, he's your program!

We plan to use this bull in our program

LOT 3 - ALC MORE PRIME L30

If you are tired of high marbling cattle that are flat sided, and one dimensional - you will love this tank of a bull. Yes, you'll still get your PRIME premiums, but there will be more pounds of them to take to the bank; just check out his combination of 1% ranks for Marbling, payweight and gain. His Confidence Plus dam is a sound-footed, balanced uddered female that had 10 calves to her credit and a 106 MPPA before her 4th birthday.

We plan to use this bull in our program

LOT 4 - ALC LESS IS MORE L31

If you like the idea of your customers cashing bigger checks for PRIME premiums and paying less feed bill - here's the bull you need to own.

His unique combination of Marbling and Feed Efficiency and Fertily predicts profit at every link of the Beef supply chain. His dam has an enviable progeny record with average ratios of: 108 weaning, 109 yearling, 103 IMF and 116 REA.

If you like packing lots of pounds into a moderate framed, deep ribbed, thick quartered package - you might have just found the direction of your program for the next decade or so.

We plan to use this bull in our program

LOT 5 - WEDEL BASES COVERED 3556

You're going to be so impressed with this bull's potential to improve fertility, marbling, feed efficiency, and pay-weight you'll forget he's a "Sleep-all-Night" calving ease specialist. His Maternal Grandsire was purchased by Melvin Leland in our 2019 sale as our highest selling Genuine son to date. His Maternal Grandam, E7102 produced the \$80,000 Ranchmaster. His Maternal Great-Grandam, 235B has a beautiful udder as a 10-year-old and is also the grandam of last year's \$34,000 high seller, Wedel Equilibrium 2016K

We plan to use this bull in our program

You'll want to pen this stud right by the ranch sign on the highway - especially when you have calves for sale. If you have customers that sell on the big summer video sales, they need to be using sons of Lot 12 with his best 1% Gain and Grade. With three full-brothers in the first 12 lots, you know this is a fool-proof pedigree.

It's almost not fair to stack Genuine and Prime-Time in the same pedigree, but we do it as often as we can. Both sires contribute big time marbling, excellent calving ease, heavier pay-weights and tremendous fertility and profit indices. With the first Prime-Time daughters calving this spring, it looks like they'll have excellent udder quality like the Genuine daughters.

Uniformity is one of the easiest, least expensive and most certain ways to add value to a calf crop. Consider turning out a set of half-brothers, like 29-31. All will help marbling, feed efficiency (F:G), fertility and payweight.

Our lead-off SimAngus bull has never missed a beat; 11% lighter at birth, he was 23% heavier at weaning and 19% heavier at a year with 9% more IMF and 28% larger REA. He is the top Feed Efficiency bull in the sale and one of the best on the planet with a rank of best 1/100th of 1%. His 113 MPPA dam had a 330 day calving interval between her first and second calves.

Wedel & ALC Hybrids...

The Wedel and Anderson families are serious about SimAngus genetics, and really like the Hybrid bull approach to crossbreeding. Hybrid bulls like those selling as Lots 51-59 allow our customers to inject some heterosis into their cow-herds without big swings in cow size or days to finish in the steer progeny.

Our hybrid cows run on the same range as our Red Angus, and every one is enrolled in Total Herd Reporting (THR) - just like our Red Angus have been since THR was adopted in 1995.

You shouldn't have to give up calf value to get live calves. That's what we love about the Ranchmaster sire line; high accuracy calving ease that still weighs up at both weaning and gain when they get on feed. Lots 84 & 86 are three excellent examples.

WFL Defender E7089 "PAYDIRT" is the sire of Lots 103-105. We collected PAYDIRT before he sold in our 2018 to long-time customer and former Red Angus Commercial Producer of the Year, DeLong Ranches of Winnemucca, NV. When those PAYDIRT offspring hit the ground in 2019, we called the DeLong family and bought him back. Paydirt sired Wedel Magnanimous 1050, the herd sire we own with 5L Red Angus in Sheridan, MT.

Wedel Beef Genetics' Commercial Heifer Sale

- 1) Commercial Heifers to sell immediately following the bull sale.
- 2) All open heifers have been pelvic measured and reproductive tract scored.
- 4) Heifers will sell in gate cut groups of 10 head within their respective lot number.
- 5) Successful bidder may "roll" successive groups within the same lot.
- 6) Commercial Heifers sell F.O.B. Wedel Beef Genetics, Leoti, Kansas. Buyer is responsible for trucking costs.

Lot 201 - Commercial Red Angus Open Yearling Replacement Heifers

70 head of Red Angus open yearling replacement heifers that we purchased from some of our most progressive Bull Customers' Herds. There are multiple Red Angus Commercial Producer of the Year awards and many GridMaster awards represented in these heifers.

Pelvic measured & repro tract scored • Guaranteed Open and ready to breed for Spring 2025 calves • 100% OCV
Solid Red Approx. Wt. 800 lbs. • Same Vacc/Parasite Protocol as our registered replacement Heifers

Range Ready Replacements backed by Multiple Generations of Wedel Beef Genetics!

LOT 301 - WEDEL GENUINE 3561

Welcome to our 2024 "U-Pic-Em" Heifer Sale. In each of these 10 lots, two sisters are paired together. The successful bidder gets their choice, and we'll gladly keep the other sister.

To get our female sale kicked off right, here are two full-sisters to our 2024 Lead-off bull, Wedel Grand Slam 3377, and like their full-brother, they come with "off-the-charts" marbling and Profit indices. If there was an EPD for phenotype, Lot 301 would be top 1%.

Sells open and ready to breed.

**Selling Buyer's Choice of:
Lot 301 or Lot 302**

LOT 302 - WEDEL GENUINE 3562

Warning, we didn't make these choices easy, and that was done on purpose because we want to be happy with the sister we keep.

One reason we know we're going to be happy with whichever of these sisters we get to keep is that they both (along with the 4 brothers selling) come from one of our best cow families. Their maternal grandam, 6094 might be the highest producing cow we own with a 120 MPPA and stays fat on native west Kansas range. Her great-maternal grandam, 071Z produced 10 natural calves as an 11-year-old and maintained a 109 MPPA. 071Z is also the maternal grandam of Cornerstone!

Sells open and ready to breed.

LOT 303 - ALC MISS GENUINE L331

Wow, whoever said you had to sacrifice phenotype to get high marbling, high performance, high profitability females never saw Lot 303. And, you know that type and kind runs in the family because she's a full-sister to the amazing herd bull prospect that sells as Lot 3.

Lot 303 earned her better than 1% Marbling EPD the old-fashioned way - with a 111 IMF ratio.

Sells open and ready to breed.

LOT 304 - ALC MISS GENUINE L356

Lot 304 and her sister are the next step in a highly productive cow family. Their beautiful uddered Confidence Plus dam maintains a 106 MPPA. Their maternal grandam has weaned 3 calves with a 107 average progeny weaning ratio and an average IMF ratio of 110. Lot 304 edged out her sister with a 113 IMF ratio.

Sells open and ready to breed.

LOT 305 - ALC MISS PRIME-TIME L350

This Prime-Time daughter has been a superstar since weaning where she posted a 120 weaning wt. ratio, which she followed with a 117 yearling and 106 IMF ratio. Her high fertile Authority dam maintains a 344 day calving interval.

The first Prime-Time daughters calved this spring, and we couldn't be happier with the udder quality and fleshing ability.

Sells open and ready to breed.

LOT 306 - ALC MISS PRIME-TIME L3109

The sire of Lots 305 - 308, Wedel PRIME-TIME 0007 was the leadoff and high-selling bull in our 2021 sale.

We had some really good Nextpectation daughters that were nearly 10 years old and still sound and functional, so we were actually trying to regenerate some more daughters and made PRIME-TIME in the process.

As it turns out, once we saw the first PRIME-TIME daughters in production, we're not going to ever need to go back to Nextpectation again.

Sells open and ready to breed.

LOT 307 - WEDEL PRIME-TIME 3563

Here's two more PRIME-TIME daughters that are out of a beautiful uddered Genuine Grandaughter, who is out of RanchMaster's dam.

Lot 307 is one you'll want to turn out down near the ranch sign to help stop traffic. Her elite \$Profit rank undoubtly results from her balancing 9 traits in the top 15%.

Sells open and ready to breed.

Selling Buyer's Choice of:

LOT 308 - WEDEL PRIME-TIME 3566

Prime-Time has revolutionized what we can expect from Calving Ease cattle. Now we can have sleep-all-night calving ease with more pounds, faster gains, breed leading quality grade, and fertile, beautiful uddered daughters.

Lot 308 is strong topped, deep ribbed and like her dam, very easy on the eyes.

Sells open and ready to breed.

LOT 309 - WEDEL CORNERSTONE 3033

We couldn't be happier with the Cornerstone 2-year-olds that are having their first calves this spring - sound udders and great mothers. Lot 309 is moderate framed, long bodied with lots of shape in her lower rib. Her 2-year-old Ranchmaster dam is out of a 102 MPPA Merlin daughter. A Cornerstone out of a double-bred Merlin should be a recipe for docility and great feet.

Sells open and ready to breed.

LOT 310 - WEDEL CORNERSTONE 3059

Here's a deep ribbed, wide sprung Cornerstone daughter that we believe is going to make a great brood cow. We thought Cornerstone was one of the best footed bulls we'd ever sold back when he was a yearling in 2021, and now with his second crop of bulls on the ground; looks like he's passing that on. Don't miss the opportunity to own the walking rights on Cornerstone - They sell right between his sons and daughters on March 12, 2024!

Sells open and ready to breed.

LOT 311 - ALC MISS GENUINE L337

With several of these pairs of sisters, you could be picking your next donor as well as ours!

Lots 311 and 312 are full-sisters to the powerful herd sire that sells as Lot 4. Their dam is one of the most genetically prepotent donors we've ever owned; every calf, in every flush is really powerful.

Sells open and ready to breed.

LOT 314 - ALC MISS ENERGIZE L352

We are sharing one of our most productive and important cow families with this pair of Energize full-sisters out of H002, our Ashland Black/Red donor dam. H002 has already earned a 115, MPPA and their maternal grandam, F943 has a 111 MPPA. If you need to improve feed efficiency and want big-time spread from easiest calving 7% to the heaviest 1% at yearling, study this 314 heifer really hard.

Sells open and ready to breed.

LOT 315 - ALC MISS INFINITY L338

This pair of Infinity sisters half superb phenotype, and they represent outcross pedigrees for most of the popular sires today. Their EPD suite suggest both will be able to mass produce the balance trait bulls with enough calving ease to be used on the heifers, but enough growth and carcass to work great on the cow herd as they mature.

Sells open and ready to breed.

LOT 316 - ALC MISS INFINITY L351

The dam of these fancy Infinity daughters that sell as Lots 315 and 316 is also the maternal grandam of Lots 313 and 314. We really are sharing the very best from our most prolific cow families, with one caveat - we will not sell both heifers.

Sells open and ready to breed.

LOT 317 - WEDEL VALUE ADDED 3183

Don't go anywhere...we're not done selling \$20,000+ \$Profit females. These are the kind that have the combination of superior phenotype and EPD profile to put bulls in the front of your sale order for years to come. Pay special attention to her excellent Fertility EPD which supports her triple-digit \$Ranch value.

Sells open and ready to breed.

LOT 318 - WEDEL VALUE ADDED 3203

The sire of Lots 317 & 318, Wedel Value Added 0109H was purchased in our 2021 sale by two pretty good cowboys - Blake Angell and Kevin Unger. Like her sister, 318 excels for Fertility but comes with an added dimension of marbling.

Sells open and ready to breed.

LOT 319 - WEDEL MAGNANIMOUS 3047

The sire of Lots 319 and 320, Magnanimous was the \$30,000 feature in our 2022 bull sale going to 5L Red Angus in Sheridan, MT. Larry Mehlhoff says the Magnanimous progeny have loads of power packed in a moderate frame.

Lot 319 has never had a bad day, earning ratios of 118 weaning, 113 yearling and 111 IMF. Her dam maintains a 342 day calving interval and a 115 average progeny weaning ratio.

Sells open and ready to breed.

LOT 320 - WEDEL MAGNANIMOUS 3271

If you liked the shape and power of the Magnanimous bulls, we think you're really going to like these females we've selling as Lots 319 & 320.

Both of these heifers are moderate framed, long bodied with tremendous depth and shape of rib.

They are the type of females that will make it through a drought in western Kansas or a hard winter in Southwest Montana.

Sells open and ready to breed.

Sleep all Night - with Rock Solid Accuracy!

Ranchmaster has emerged as the "Go-To" sire for large commercial heifer breeding projects with his Rock Solid accuracy for low birth weight and unassisted births. Plus, he also still improves pay-weight and quality grade. Best yet, Ranchmaster has proven to be very dependable in terms of his progeny's foot structure, and his first daughters calved last spring with excellent udder quality.

Pledge: Wedel Red Angus guarantees the fertility and disposition of every animal purchased through the sale.

Sale Terms and Conditions:

Bidding: The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final. Terms of the sale are cash.

Purchaser's Risk: Each animal becomes the risk of purchaser as soon as it is sold. Wedel Red Angus will care for sold animals free of charge until loaded for shipment, or until one week after the sale - but at the purchaser's risk.

Announcements from the auction block shall take precedence over this and all other printed material.

Identification: Seller offers each bull with a readable tattoo corresponding to its registration.

Guarantees: All animals sell under the guarantees as suggested by the Red Angus Association of America, a copy of which will be made available at the sale.

Rights and Obligations:

A) The above terms and conditions of sale shall constitute an agreement between buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitute a separate transaction.

B) All persons attend the sale at their own risk. Neither Wedel Red Angus, nor any other person connected with the management of the sale assumes any liability, legal or otherwise.

Delivery:

- Bulls will be delivered **FREE** of charge for the first 500 miles and at cost after that.
- Deliveries begin immediately after the sale. If you prefer not to take delivery as scheduled, we will care for your bull purchases at our risk for \$4.00/hd/day to cover feed costs. The cost begins on April 1st and continues through the date your bulls are picked up.
- Please advise the sale clerks of an appropriate date for your bulls to be picked up and the appropriate feed costs will be included in your invoice.
- We always appreciate your assistance in getting the bulls delivered in a timely manner.

Retained interest & Semen Rights:

Wedel Red Angus will retain 1/2 semen interest on all bulls. Purchaser receives 100% possession and 100% salvage value. Wedel Red Angus reserves the right to collect, use and market semen; purchaser has equal right to do the same. Unless mutually agreed, semen collection will be at Wedel's expense and the purchaser's convenience. Wedel Red Angus will assume full liability at the purchase price of the bull during collection, including transportation to and from the collection facility - unless the collection is mutually agreed upon between Wedel and the purchaser, in which case the liability and expenses will be shared equally.

Scrotal Circumference & Fertility:

All bulls have been fertility examined to insure against seminal vasculitis. All bulls have been semen tested and the purchaser will receive a breeding soundness evaluation which follows the guidelines established by the Society of Theriogenology. Scrotal measurements were adjusted to 365 days.

All bulls will be Trick tested negative.

Category:

This classifies an animal's registration with the Red Angus Association of America (RAAA) according to its percentage of Red Angus blood:

- 1A** 100% Red Angus; no disqualifying features.
- 1B** Greater or equal to 87% Red Angus blood, but less than 100%; no disqualifying features.
- 2** Equal or greater to 87% Red Angus and up to 100%; with disqualifying characteristics.
- 3** Less than 87% Red Angus.
